ISLE STYLE

Four Grand Cayman-based architects who are shaping the island’s landscape share examples of their work that consider the tropical climate and aim to mature with time, all while putting first their clients’ needs.

This striking ultra-modern house, fused with bold design, contrasts black and white exteriors that play with the effects of light and shadow while offering dramatic water views on both the canal and North Sound.

Robert Towell Architect Ltd.
www.roberttowell.com

Über-modern sustainable family home with commanding views designed to harness the elements. ▶

◀ This modern home embraces the art of true outdoor living – shading at the hottest time and naturally capturing the prevailing breezes.

Design Cayman Architects
www.design-cayman.ky

◀ This contemporary residence was designed with a fresh Caribbean aesthetic composition and provides seamless transitions between interior and exterior living spaces.

This minimalistic home showcases clean lines, but maintains warmth and comfort by integrating natural materials in the exterior finishes.▶

Trio Design Consultants
